

Native Email Client

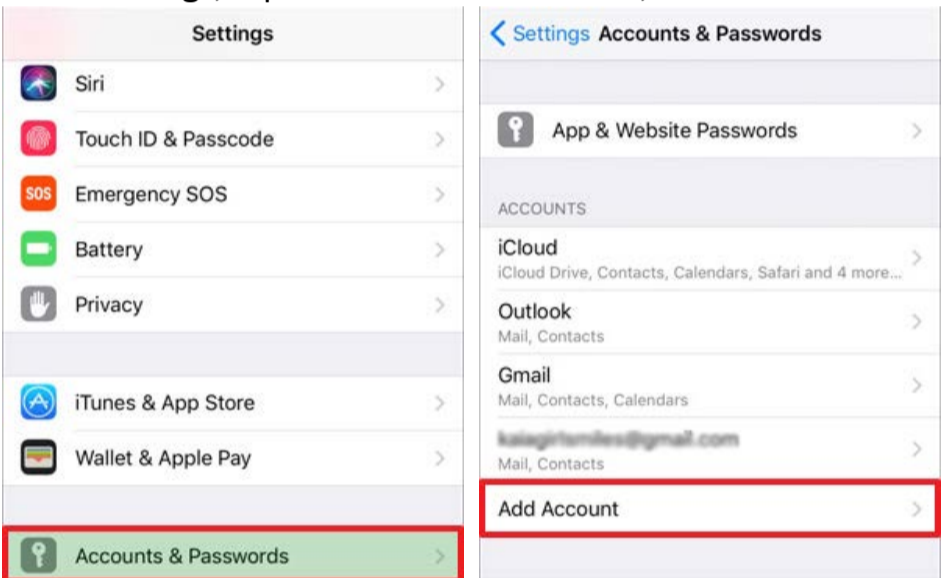

The native email client can be used to access FMOLHS email on your mobile device. Should a team member leave the organization, a selective phone wipe (FMOL email content only) will be initiated to protect patient privacy. If the selective phone wipe is not successful, a full phone wipe will occur and all information will be deleted from the phone.

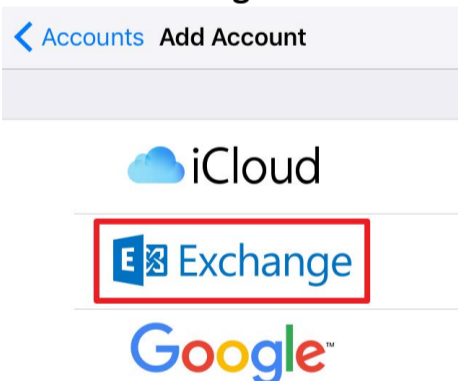

Here's what to do:

The following details the process for iOS. Android will follow a similar process, but menu options and locations may vary.

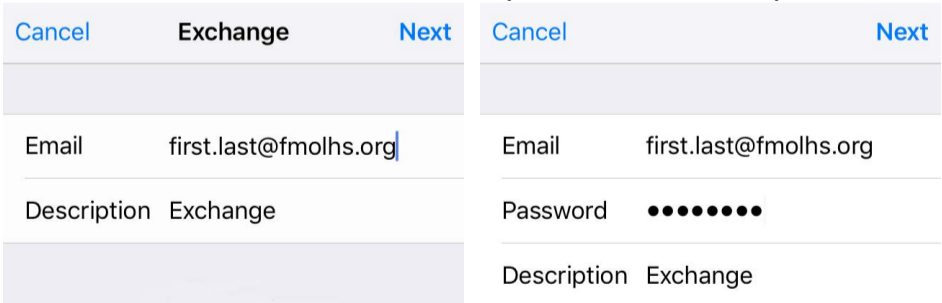

1. **Intune** is required. **iOS Instructions** or **Android Instructions**
2. From **Settings**, tap **Accounts & Passwords**, then **Add Account**

3. Choose **Exchange** as account type.

4. Enter e-mail address and a description, then enter password.

5. For Username, enter email address.
6. Ensure Mail is enabled and tap **Save**.
