

Setting Wi-Fi on Your Personal Device

Attention: Physicians, Mid-Levels, and Clinicians St. Francis

In an effort to provide you with a faster, more secure network, FMOL has a new Wi-Fi network for you to connect your personal device (iPad or iPhone) to. You no longer need to connect to the facilities Guest Network. To make the switch, click **Settings** from your home screen on your personal device..

Touch **Wi-Fi** under the Settings column. Touch the slide to turn Wi-Fi **ON**.

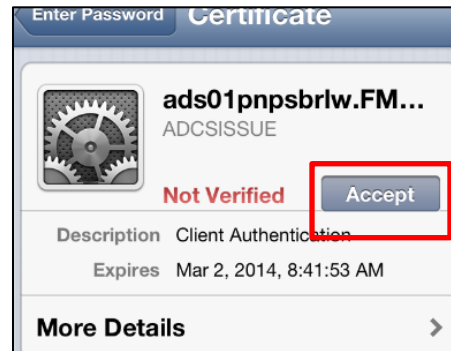

Click the blue arrow next to **FMOLHS** under **Choose a Network**.

Enter your **Username** and **Password** (same as Cerner). Click **Join**.

The FMOLHS network will automatically connect for you when you enter the facility.

Click **Accept** on the Certificate screen.

In the event you have stfran guest as an available network you need to delete it from your selections. Click the blue arrow next to **stfran guest**. Click **Forget this Network**.
